DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 22, 30-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There are no Figures directed to the claims 22, 30-43. For example if one were to assume Figure 2 as applicant suggested in the "Remarks filed 2/28/05", the hull (22), riser (14), inner tubular member (32) then there is no outer tubular member. Assume Figure 3, riser (14), inner tubular member (52), outer member (24), then there is no annular flange that rigidly connect one end of the outer member to the inner member. Figure 4 shows riser (14) but does not show an inner or outer tubular member. Figure 5 riser (14), inner tubular member (92) this is not rigidly connected to the riser and outer tubular member (100) is not rigidly connected to inner tubular member at one end. Figure 6 does not meet the limitation of rigidly connecting outer tubular member (116) to inner tubular member (114). Figure 7, inner tubular (138) and riser cannot be the same member and if one were to consider (140) as the inner member then outer member (144) is not spaced apart from the inner tubular member.

Art Unit: 3673

This being said, it is clearly the amended claims constitute new matter thus not enabling one skilled in the art to make and/or use the invention as disclosed.

Response to Arguments

3. Applicant's arguments with respect to claims 22, 37 and 42 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
